

Reverence for Mother Nature and Elementals

OM Mani Padme Hum AUM

In the name I AM THAT I AM, our beloved Holy Christ/Buddha Selves and Holy Christ/Buddha Selves of all lightbearers throughout cosmos, beloved Mother Mary and Kuan Yin, Sanat Kumara and Lady Venus, Saint Germain, Jasmine, Prince Oromasis and Diana, Aries and Thor, Neptune and Luara, Virgo and Pelleur, their gnomes, undines, sylphs and salamanders, Lord Lanto, Hilarion, Charity, Lanello, the Buddha Mother and all true messengers of God, all ascended and cosmic beings, legions of angels and archangels, Elohim, Buddhas and bodhisattvas of heaven, we pray:

Sanat Kumara and Lady Venus, come quickly to Earth with cosmic reinforcements and legions of angels to illumine the hearts and minds of mankind and consume ignorance of the interconnectedness and Oneness of all life. Instill wisdom, the importance of working in harmony with Nature, and a greater sensitivity to the elementals who serve Mother Earth to restore Earth as a healthy platform for our spiritual evolution, self-transcendence and physical existence. Inspire in all a new reverence for the Mother and the rich tapestry of light she has created that is the complex web of life of which we are a part.

Beloved Saint Germain, awaken humanity to awareness of the dark side of technology that misuses your Light energy and gifts of technology for the Aquarian Age. Reverse the tide of dangerous technologies that disrupt Nature, harm elemental life, and threaten human life as well. Replace them with technologies that are free from pollution or harmful energies and by-products. Help mankind understand and appreciate how critical Mother Nature and her elementals are to our survival, as well as our enjoyment.

We call for farmers and agribusinesses around the world to stop using chemical pesticides and fertilizers, genetically modified organisms, monoculture, nonviable seeds and other non-sustainable agricultural practices to create greater crop yields and excessive corporate profits. Bring forth the widespread use of sustainable technologies and agricultural practices that work in harmony with nature, such as organic or biodynamic farming. We call for the protection and healing of all elementals, especially the bees, bats and others, that are critical for the production of our food and all of Nature that give us life, beauty and joy.

We call for governments around the world, especially the United States Congress and the Department of Agriculture, to create new policies and regulations to stop the use of harmful chemicals, bioengineering, radiation and other harmful or non-sustainable practices in agriculture and food processing. Return our farmlands to natural agriculture, horticulture and arboriculture.

Beloved Mother Mary, expose the full impact of those industries and multinational corporations that are harming Mother Earth and the elemental kingdom through greed, misuse of chemistry, bioengineering and other harmful technologies. Replace their ignorance with enlightened determination to work in harmony with Nature for the benefit of all. Help humanity learn to live in balance with the earth and return to the first principles of reverence for life, the acceptance of that which God has created, and the importance of living in harmony with all life.

We send gratitude, praise and love to all elementals for their magnificent service and all they do to maintain Earth as a healthy and beautiful platform for our evolution.

O mankind, return to the heart of the Mother as Mother Earth and free her blessed elementals! (3x)

According to God's holy will, let it be done.

In the fullness of your cosmic joy, we accept ...
